

Heavy-Duty Access Mats and Portable Roadways

Engineered and manufactured by Signature Systems Group, MegaDeck® HD is the trusted choice for military deployments and humanitarian relief efforts due to its ease of installation and clean, protective surface. MegaDeck® is the ideal vehicle and equipment mat for multiple applications and surface types. It can be used to create access roadways, helicopter landing pads, maintenance areas, motor pools, warehouse or hangar floors, encampments, and even mobile medical facilities.

MegaDeck® HD is the strongest modular matting system Signature Systems Group manufactures. Its unique composition of HDPE, UV Protection, anti-static and other additives makes it non-absorbent, prevents degradation, and eliminates warping and breaking due to climate.

MegaDeck® HD features a locking system which allows you to connect panels easily and in a variety of configurations using a single T-bar tool. Mats are laid together seamlessly due to their 12" flanges which guide the mat into place. MegaDeck® HD is as easy to install as it is durable.

NEW & IMPROVED!

- Strongest composite mat on the market
- Solid perimeter construction eliminates fluid saturation of mats
- Enhanced aggressive traction
- Supports loads up to 600 PSI
- Compatible with original MegaDeck and other matting systems

MegaDeck® HD is simple to Use – Over and Over Again

MegaDeck® has been designed to be simple to clean and maintain. It can be used hundreds of times, installed with little to no ground preparation over grass, gravel, sand, soil, concrete, asphalt, ice, snow, mud and other surfaces. This versatile matting system ensures reliable access for almost any vehicle and support for heavy equipment.

Benefits

- Save time on installation and redeployment
- Stores and ships easily – 3,380 ft² per ISO 40 HC
- Creates a clean, sturdy and uniform work site
- Mat can be cleaned and decontaminated

Non-absorbent HDPE prevents cross-contamination between sites, allowing for multiple uses

The #1 trusted access matting in the world.
