

Create a Portable Roadway Anywhere in the World

Trust your stadium to SignaRoad® – Signature Systems Group's ground protection mat designed to create a medium-duty temporary roadway, accessway or working platform quickly and easily.

This high-quality 100% virgin HDPE composite matting is strong enough to withstand heavy-haul loads and versatile enough to be used ground protection applications that range from temporary events to turf protection during major stadium renovations.

From temporary roadways for remote utility repair projects to fully connected working platforms for construction sites, SignaRoad is ready to provide superior temporary access and ground protection with its advanced design features and easy-to-use connection system.

SignaRoad Can Be Used For:

Portable Roadways: Create an instant roadway for vehicles in adverse ground conditions and climates

Parking Lots and Staging Areas: Provides a secure and stable (non-shifting) area for staging vehicles and equipment

Working Platforms: Create a solid, stable and hygienic surface for crews and equipment

Pedestrian Accessways: Easily create a clean and safe walkway for guests

FEATURES & BENEFITS

- Virgin HDPE composite material is strong, durable and non-conductive
- Compact size is compatible for vehicle use worldwide
- One part design - no bolts or screws
- Relatively lightweight for simplified handling and lower transport costs

SignaRoad is Simple to Use – Over and Over Again

SignaRoad® has been designed to be simple to clean and maintain. It can be used hundreds of times, installed with little to no ground preparation over grass, gravel, sand, soil, concrete, asphalt, ice, snow, mud and other surfaces. This versatile matting ensures reliable access for almost any vehicle.

Breakthrough Design Features

Tested against our competitors in the market, our SignaRoad matting systems are ranked #1 for strength, durability and traction.

Locking Pin Connection System

Quick and simple to install. Strongest composite pin on the market.

Overlapping flanges

Speeds up installation and provides additional strength and rigidity to entire work pad. Keeps surface free from mud.

Virgin HDPE composite construction

Premium long-lasting mats can be used on uneven surfaces and challenging terrain in any climate.

Use SignaRoad in Multiple Applications:

- Roadways
- Accessways
- Extreme weather and climates
- Heavy-haul
- Construction
- Special Events
- Ground Protection
