

Create a Portable Roadway Anywhere in the World

Trust your next event to SignaRoad® – Signature Systems Group’s matting product designed to create a clean, safe roadway or platform quickly and easily.

This high-quality 100% virgin HDPE composite matting is strong enough to withstand heavy loads and versatile enough to be used in multiple applications.

From temporary roadways or platforms in wet and muddy areas or simple locations where heavy equipment for stage and event setup would damage the event grounds, SignaRoad is ready to provide superior temporary access and ground protection with its advanced design features and easy-to-use connection system.

SignaRoad Can Be Used For:

Portable Roadways: Create an instant roadway for vehicles in adverse ground conditions and climates

Parking Lots and Staging Areas: Provides a secure and stable (non-shifting) area for vehicles, staging and equipment

Platforms: Create a solid, stable and hygienic surface for stage crews and equipment

Pedestrian Accessways: Easily create a clean and safe walkway for guests and personnel – virtually anywhere

FEATURES & BENEFITS

- Virgin HDPE composite material is strong, durable and non-conductive
- Compact size is compatible for vehicle use worldwide
- One part design - no bolts or screws
- Relatively lightweight for simplified handling and lower transport costs

SignaRoad is Simple to Use – Over and Over Again

SignaRoad® has been designed to be simple to clean and maintain. It can be used hundreds of times, installed with little to no ground preparation over grass, gravel, sand, soil, concrete, asphalt, ice, snow, mud and other surfaces. This versatile matting works with nearly any vehicle and provides up to 400 PSI support for stages, equipment, and vehicle parking.

Breakthrough Design Features

Tested against our competitors in the market, our SignaRoad matting systems are ranked #1 for strength, durability and traction.

Locking Pin Connection System

Quick and simple to install. Strongest composite pin on the market.

Overlapping flanges

Speeds up installation and provides additional strength and rigidity to entire platform. Keeps surface free from mud or dirt.

Virgin HDPE composite construction

Premium long-lasting mats can be used on uneven surfaces and challenging terrain in any climate.

SPECIFICATIONS

Module Size

Actual

6.8 ft x 10 ft x 2.5 in
2 m x 3 m x 6.4 cm

Useable Platform

6 ft x 9.3 ft x 2.5 in
1.9 m x 2.8 m x 6.4 cm

Useable Roadway

6 ft x 10 ft x 2.5 in
1.9 m x 3 m x 6.4 cm

Weight

432 lbs (196 kg)

Weight Load

400 psi
