

Warranty SIMONA® PE 500 UV

For a period of 10 years as from delivery by SIMONA AG or a legally affiliated company we give the following warranty for sheets made of SIMONA® PE 500 UV, according to our present weathering results in outdoor use:

- After 10 years of outdoor use in Europe, north of the 50st degree of latitude, the colour will not change by more than $\Delta E^* = 4$ CIELAB units (L^* , a^* , b^* system) compared to original colour samples not exposed to weather. The evidence of a higher colour deviation is incumbent upon the customer.

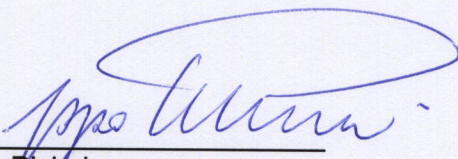

This warranty is conditional upon the following:

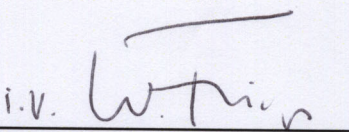

- It applies to non-deformed sheets without any change in sheet thickness.
- The sheets must not be exposed to stress due to chemical or mechanical influences.
- Compliance with our product information (For example the thermal change in length has to be considered when mounting the sheets. The cut edges have to be protected.).

The cleaning of such sheets should be done with diluted aqueous household cleaning agents; not with solvent-based cleaning agents or abrasives!

In the event of a justified warranty SIMONA AG will, at its option, replace materials free of charge or credit the customer with the value of the sheets delivered. This warranty explicitly does not cover any other claims. SIMONA AG's liability resulting from this warranty shall always be limited to the value of the delivered sheets at the time of the sale.

SIMONA AG
